LAVKUSH KUMAR

AZURE DATA ENGINEER | CLOUD DATA PLATFORMS & LAKEHOUSE

Hyderabad, India | +91 9122036484 | lavkushry@gmail.com | linkedin.com/in/lavkushry | github.com/lavkushry

TECHNICAL COMPETENCIES

Data Platforms & Lakehouse: Azure Databricks, PySpark (Spark SQL), Delta Lake (ACID, Time Travel, Liquid Clustering), Azure Data Factory (ADF), ADLS Gen2, Medallion Architecture (Bronze/Silver/Gold).
Streaming & Databases: Apache Kafka, Redis, PostgreSQL, TimescaleDB, MongoDB, advanced SQL (window functions, CTEs).
Cloud & DataOps: Terraform (IaC), AWS (EKS, VPC, IAM), Docker, Helm, Jenkins CI/CD, GitLab CI, Linux/Bash, Git.
Observability & Governance: Prometheus, Grafana, ELK Stack (Logstash Grok), Data Quality Gates, Unity Catalog concepts.

PROFESSIONAL EXPERIENCE

DevOps Engineer (Cloud Infrastructure & Automation) | CGI India (PNC Bank GCC) — Jun 2026 – Present

- Standardized multi-tenant AWS EKS cluster infrastructure using Terraform modules and Ansible, establishing reproducible VPC peering, IAM role bindings, and auto-scaling node groups across environments.
- Engineered declarative CI/CD pipelines across Jenkins and GitLab CI with Trivy vulnerability scanning and quality gates, cutting deployment lead time by 40%.
- Hardened ingress routing and data API gateway policies using Nginx Ingress and Kong Gateway with rate-limiting and mTLS, slashing gateway latency overhead by 15% across 8 production microservices.

Engineer 1 - DevOps - Platform Engineering | Himachal Futuristic Communications (HFCL) — Aug 2025 – Jun 2026

- Orchestrated stateful distributed data backbones (Apache Kafka, Redis, PostgreSQL, TimescaleDB, MongoDB) on Kubernetes via StatefulSets; configured Velero DR and Prometheus/Grafana alerts, slashing RTO from 8h to 30min (93% reduction) and MTTR by 45%.
- Automated bare-metal Kubernetes (kubeadm) cluster lifecycle management using 40+ Ansible roles and Jinja2 templates (OS hardening, CNI, Harbor, Helm), cutting cluster bootstrap time from 2 days to 4 hours (83% reduction).
- Operated a 50-node on-premise Kubernetes platform for 15+ mission-critical microservices with namespace isolation, RBAC, and HPA, sustaining 99.95% platform availability.

Security Analyst Apprentice (Log Analytics & Telemetry) | CGI India — Sep 2024 – Aug 2025

- Deployed centralized log telemetry pipelines via ELK Stack (Elasticsearch, Logstash, Kibana), authoring custom Logstash Grok patterns that transformed unstructured telemetry into structured schemas and accelerated incident triage by 50%.

FEATURED DATA & CLOUD PLATFORM PROJECTS

Enterprise Medallion Lakehouse Platform on Azure | *Azure Databricks, PySpark, Delta Lake, ADF, ADLS Gen2*

- Architected an end-to-end Medallion Lakehouse on Azure Databricks and Delta Lake, orchestrating ADF pipelines to ingest transactional event datasets into curated Bronze, Silver, and Gold layers on ADLS Gen2.
- Optimized distributed PySpark batch transformations with schema validation and partition pruning, slashing ETL pipeline runtime by 35% while ensuring ACID transactional consistency.

Project Vulcan - Enterprise Automation Control Plane | *Python, FastAPI, Redis Redlock, MinIO S3, PostgreSQL*

- Built an infrastructure control plane in Python (FastAPI), engineering distributed locking via Redis Redlock and decoupled MinIO S3 storage to eliminate concurrent data pipeline race conditions.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science and Engineering | Maharishi Dayanand University (MDU), Rohtak (2020 – 2023)
Certifications: Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft SC-200 | Databricks Data Engineer Associate (In Progress)
